Products By Amazon
amazonassociates
Amazon Associates is an affiliate marketing program that allows website owners and bloggers to create links and earn referral fees when customers click through and buy products from Amazon. It's completely free to join and easy to use.
Provide consumers the convenience of referring them to a trusted site where they can immediately purchase products you advertise. And when they do, you can earn up to 10% in referral fees.
Take advantage of various Amazon retail promotions and leverage our newly created advertising features to drive traffic and earn referrals.
TicTacToe
Tic-tac-toe (American English), noughts and crosses (Commonwealth English and British English), or Xs and Os(/ˈɛks ˈɒnˈzˈiːˈzˈ/ (Ireland), is a paper-and-pencil game for two players, X and O, who take turns marking the spaces in a 3×3 grid. The player who succeeds in placing three of their marks in a diagonal, horizontal, or vertical row is the winner. It is a solved game with a forced draw assuming best play from both players.
Password Generator
A random password generator is software program or hardware device that takes input from a random or pseudo-random number generator and automatically generates a password. Random passwords can be generated manually, using simple sources of randomness such as dice or coins, or they can be generated using a computer.
Quote Machine
Quote Machine made using HTML5, CSS3, JavaScript.
Displaying Quotes fetching from array list using javascript.
Formatting done using html5 and css3 coding.
Time Table Generator
A schedule or a timetable, as a basic time-management tool, consists of a list of times at which possible tasks, events, or actions are intended to take place, or of a sequence of events in the chronological order in which such things are intended to take place.
RSA
RSA is a public-key cryptosystem that is widely used for secure data transmission. It is also one of the oldest. The acronym RSA comes from the surnames of Ron Rivest, Adi Shamir, and Leonard Adleman, who publicly described the algorithm in 1977.
SHA256
256
SHA-2 is a set of cryptographic hash functions designed by the United States National Security Agency and first published in 2001. They are built using the Merkle–Damgård construction, from a one-way compression function itself built using the Davies-Meyer structure from a specialized block cipher.
Budgetary Control App
Budgeting apps can help track your personal finances on the go to give you an overall picture of what you're earning, what you're spending, and what you may need to change.
Car Rental System
Car rental is when you rent a car. The company providing you the car becomes the car rental service provider, whereas you become the car hirer, as you hire the car for a fee.
Meal Delivery System
A meal delivery system is a service that sends customers fresh or frozen, prepared meals delivered to their homes and offices. These services individually package pre-portioned meals to assist with eating a healthy diet.
Event Handling Application
Event handling is the receipt of an event at some event handler from an event producer and subsequent processes. The processes involved in event handling include: Identifying where an event should be forwarded. Making the forward. Receiving the forwarded event.
Simple Calculator
A calculation is a deliberate process that transforms one or more inputs into one or more results. One that calculates: such as. a : a usually electronic device for performing mathematical calculations. b : a person who operates a calculator.
Pothole Complaint System
1a : a circular hole formed in the rocky bed of a river by the grinding action of stones or gravel whirled round by the water. b : a sizable rounded often water-filled depression in land. 2 : a pot-shaped hole in a road surface.
